- 550 Mbit NAT
- 5x Gigabit WAN/LAN
- WLAN
- Web-Gui

CTFROUTER is a complete, pre-installed, ready-to-go Multi-WAN router with many features.

The particular strengths are in the comfortable operation via a web interface (multilingual), the extensive functionality with even server functions (mail, Groupware, SQL,...) and especially in the support of up to 5x WAN inputs (eg. DSL, cable modem ,...).

CTFROUTER are available in 4 versions :
- CTFROUTER-1 with 550 Mbit NAT performance
- CTFROUTER-1-F with 550 Mbit NAT performance [Fanless]
- CTFROUTER-2 with 350 Mbit NAT performance
- CTFROUTER-2-F with 350 Mbit NAT performance [Fanless]

Hardware :
- Serener GS-L05 (Fanless, for Jetway JNC9C-550-L) enclosure
- picoPSU-80 DC/DC (80 Watts)
- AC adapter (12V, 60W)
- Jetway NC9E-525 ITX mainboard (with integrated Atom 2x1.83Ghz CPU, 2x Realtek-Gigabit LAN)
- 2GB SO-DDR-III RAM
- 2.5" HDD 160GB SATA
- Jetway ADD-ON 3x GigaLAN (Intel Chips)
- Wireless LAN Mini-PCI Express [Atheros AR9280 chipset] (300 Mbit, with antenna)

Software :
ClearOS 6 :
- Open-Source
- Multi-WAN (Kabel, DSL,...)
- 5x Gigabit LAN for free configuration as WAN or LAN ports
- 550Mbit NAT performance
- VPN (PPTP, Ipsec, OpenVPN)
- WLAN Access Point (802.11 b/g/n)
- DMZ, 1-to-1 NAT
- Stateful Firewall
- DHCP / DNS Server
- Console- (VGA) + Web-GUI multi-language (20 languages)
- SSH access
- Gateway Filter (Antimalware, Antispam, Intrusion Detection,...)
- Content Filter, Access Control
- Web Proxy
- UPNP
- Dynamic DNS
- QOS
- Many Server functions (Windows Networking with PDC Support , groupware, Mail Server, MySQL, WebServer, etc...)
